

NEWS FOR IMMEDIATE RELEASE

OceanServer Delivers Iver2 AUV to Naval Surface Warfare Center

Fall River, MA – Dec 16, 2009 - OceanServer Technology announced today that it has recently delivered an Iver2 Autonomous Underwater Vehicle (AUV) to the Naval Surface Warfare Center (NSWC) Indian Head Division. NSWC will use the Iver2 AUV for sensor development, general research, and in-water evaluation of new sensors. The Indian Head Division has a long track record of critical research for the US Navy and is recognized as the nation's premier resource for energetics technology, development & innovation, and technology-based solutions.

The Iver Platform

All Iver2 AUV models come standard with OceanServer's VectorMap Mission Planning and Data Presentation tool, which provides geo-registered data files that can be easily exported to other software analysis tools. This unique design has enabled OceanServer to carve out a very strong position in the research space for Autonomous Underwater Vehicles. The VectorMap program can input NOAA ENC's or any geo-referenced chart, map or photo image, allowing the operator to intuitively develop AUV missions using simple point-and-click navigation.

The base vehicle, with a starting price at just over \$50,000 USD, gives university, government and commercial users an affordable base-platform for sensor development or survey applications in water quality, hydrography, sub-surface security and general research.

About OceanServer

OceanServer provides OEMs with innovative power solutions, sensors and robotics for a variety of applications. OceanServer's products are designed to be cost effective and easy to integrate into customer equipment. Fully engineered and well-documented subsystems can dramatically reduce time-to-market and enable new and innovative solutions for real-world application

challenges. OceanServer Technology is headquartered in Fall River, Massachusetts.
